PROJECT

REAL-ESTATE WEB APP

<https://homehaborhonpapa.onrender.com>

- Implementation:

- Secured user data with **MongoDB**, implemented **Node.js** and **Express.js**
- Enhanced profiles using **Firebase** for image uploads
- Utilized **JWT** tokens for client-side storage and improved authentication.
- Developed secure signup with **Bcrypt**, enabled **Google Authentication**
- Implemented a **React**-based frontend with **React Router Dom**.
- Styled a responsive UI using CSS and **Tailwind** CSS for an enhanced user experience.

WEATHER WEB APP

<https://hongrandpawweatherapp31-1a95412baa2e.herokuapp.com>

- Implementation:

- Implemented robust server-side functionality with **Node.js** and **Express.js**, ensuring efficient execution of server operations
- Incorporated **jQuery** and **JavaScript** for dynamic client-side interactions, enhancing user engagement with interactive elements.
- Styled a responsive UI using Pure CSS, prioritizing optimal user experiences across devices and screen sizes
- Utilized **Axios** to establish connections with a weather API, enabling seamless retrieval and integration of real-time weather data into the application
